REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Although the prior art teaches the recycling of product during the hydrogenation of compounds, this is done for temperature control which is not the case for the reaction with polymers and does not, therefore provide motivation to do the same during hydrogenation of polymers. The control of degree of hydrogenation achieved by recycling as claimed by applicants is unexpected and renders the claimed process, therefore, both novel and unobvious over the closest prior art as cited.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
